**Walkathon to help (TOD)**

**cancer patients:** DATRI is

organising a 6-km walkathon to help Rajee Nendunchezian, a 33-year-old woman with blood cancer, and many others like her who are in urgent need of a blood stem cell donor.

There are over 1200 patients waiting for a suitable donor. It will take place on Saturday from Ticel bio park to Madhya Kailash and back to Ticel. At the end of the walk participants can register themselves as potential stem cell donors. The idea behind this event is to spread awareness and register more voluntary potential blood stem cell donors.
